

CHADCO CHAT

"The Dependable Builder"

Winter 2003

Happy Holidays

With the excellent weather this fall, most of the crops are harvested and yields were very good. Now is the time, while its fresh in your mind, to look into those changes that would improve your operation. Check out your tax situation and take advantage of those savings and year-end discounts on capital purchases, and be ready for 2004.

We hope everyone paid tribute to our Veterans on November 11th and got your fill of turkey and dressing or whatever your desire, on Thanksgiving. Also that Christmas shopping is proceeding nicely. Remember to shop locally and help your neighbor!

See you at the winter shows!

Paul and all the Chadco Crew:

NEW PRODUCTS

BROCK introduced their new "Tri-Corr" floor this year. This patented plank floor design features a center support leg that greatly enhances strength and allows for a flatter surface easing cleanup during bin unloading operations. It can be easily installed over some existing floor support systems (concrete block, Behlen, Chicago Eastern) which can reduce costs if you have an older bin but desire a more modern, easy to sweep floor. **We have a few new "old style" floors available for 27' diameter bins that we are offering at reduced prices. Contact us soon!**
