Merry Christmas

The Dependable Builder

GRAINPRO

A Newsletter for Commercial Grain Handlers

Seasons Greetings from your Friends at CHADCO

Pumping the concrete walls.

Finished concrete walls.

Setting the roof panels.

All roof panels set.

Final setting of teepee.

Finished dome shingled & full of salt.

The above photos are of large bulk storage domes recently constructed by Chadco, Inc. crews for Illinois Department of Transportation. One unit was located at Elk Grove Village while the other one was located at St. Charles. Both domes were 136' diameter on top of 12' high concrete foundations with a peak height of 69'6", large framed doorway openings (18' wide x 25' high) and each unit will store approximately 14,000 tons of salt.

Our dome structures are available in many sizes and are very versatile in usage. They can be used for storage of several bulk materials such as salt, fertilizer, grain, etc.. Or, when not being used for bulk material, they may be used for warehouse and/or equipment storage.

WHAT'S NEW AT CHADCO?

<http://www.chadcoinc.com>

NEW WEB PAGE ADDITION PRE-OWNED EQUIPMENT PAGE

Recently added to our Web Site (www.chadcoinc.com) is a customer “pre-owned equipment” page. This is free of charge to you, and simple to use! There is an online form to fill out and submit to us that will include your equipment description, your name, phone number, e-mail address, asking price and whatever other information you would like to list. This information will then be listed on our customer pre-owned equipment page so all inquiries will be directed to you. All listings will be for 30 days with automatic removal at the end of that time.

If you should sell your equipment before the end of 30 days you would need to notify us to remove your listing. We will limit the number of ads you can have at any one time, however, at this time that number is undecided. Not online? Don't worry, you don't have to be online to use this service. If you wish to send or fax a copy of your equipment listing to our office we will list it for you. All ads must be approved by our company before they will be posted. We are currently listed with several different search engines and this should be a very helpful way of reducing your surplus equipment.

SWEEP AUGERS

If you need a commercial sweep auger, you'd better give us a call! We're offering the Hutchinson/Mayrath sweep augers for commercial applications. the 1012 series is for up to 3,700 bph and features reduction wheel drive or the 1214 series is for up to 6,100 bph which now uses the **commercial klean sweep tractor** with reverse able motor and optional explosion proof motor. Both of these series have very heavy flighting. We've used several of these units in the last few years and have had nothing but excellent reports on their performance.

If you have an older Hutchinson commercial sweep that does not have the reduction wheel drive, you may want to update with the addition of a **commercial klean sweep tractor**. This is a gear motor drive that is attached to your existing sweep for a more positive drive action.

NEED HIGH CAPACITY PORTABLE EQUIPMENT FOR FLAT STORAGE CLEANUP?

You might want to take a close look at our **Hutchinson/Mayrath Trac Mass-ter**. This is a tractor mount unit that is rated at 10,000 BPH utilizing a hydraulic lift heavy duty enmasse conveyor with a large 16" x 10' feeder screw conveyor. These units have been around for several years and have proven themselves very well.

Don't need that high of capacity? We also offer Hutchinson/Mayrath portable augers from 2000-5500 BPH. Also as one of Hutchinson/Mayraths largest stocking dealers, we have a wide range of replacement parts available.

CUSTOM-DESIGN SYSTEMS WITH TURN-KEY INSTALLATIONS

- Concrete
- Steel Erection
- Millwright Service
- Electrical
- General Contracting

Recently constructed Brock Next Generation 10584 grain storage tank for Ursa Farmers Co-op located along the Mississippi River at Meyer, Illinois.

GRAINPRO

DON'T LET IT HAPPEN AGAIN

If you think you need to add new or replace existing storage, drying, or handling equipment, LET'S TALK NOW! Our crews are getting booked earlier every year and finding reputable sub-contractors late in the year is becoming tougher & tougher. If you are fortunate and can locate and schedule a reputable crew late in the construction season it usually costs a premium.

We will build to your design or we can design build a complete turnkey system for you.

It's never too early to start planning your next expansion. Let's get an appointment setup now! Call 1-800-535-1752 or 309-772-2184, fax 309-772-3643, or e-mail us chadco@bushnell.net. Ask for Paul, Steve or Chuck.
